

add/addition

To combine or increase.

$$2 + 6 = 8$$

2 and 6 are
addends

addend

Numbers added together.

area = 100 units²

area

The number of square units that covers a closed figure.

base

The bottom shape of a three-dimensional figure.

cents ¢

A unit of U.S. money.

Change

change problem

A word problem with a starting amount that increases or decreases to a new amount.

circle

column

Items arranged vertically
(up and down).

$$3 - 2 = 1$$

compare

To find the difference between two sets.

$$3 + 2 = 5$$

compose

To combine numbers together.

cone

cube

cylinder

$$5 = 3 + 2$$

decompose

To break a number apart.

$$9 - 4 = 5$$

5 is the
difference

difference

The result of subtracting.

greater

less

D

difference problem

A word problem with two
amounts compared for a
difference.

0, 1, 2, 3,
4, 5, 6, 7,
8, 9

digit

A single numeral used to show place value.

dime

A U.S. coin that is worth 10 cents.

dollar (\$)

A unit of U.S. money worth 100 cents.

edge

A line segment that connects two vertices in a three-dimensional figure.

=

$$4 = 3 + 1$$

equal

When the value on the left side of the equal sign is the same as the value on the right side.

$$4 = 3 + 1$$

= is the
equal sign

equal sign

The symbol that tells you that two sides of an equation are the same.

even

A number that can be split into two equal groups.

$$\begin{array}{l} 500 + 40 + 6 \\ = 546 \end{array}$$

expanded form

A way to write numbers showing the place value of each digit.

face

The flat surface of a three-dimensional figure.

fourths/quarter

One of four equal parts (of a whole), also referred to as "quarters."

 $= \frac{1}{4}$

fraction

Part of a length, area, or set (the parts must be equal in size).

 $>$  $>$

greater than/more

When the value in one expression is larger than another expression.

half/halves

One of two equal parts (of a whole).

hexagon

horizontal

In a left-to-right orientation lined up with the horizon.

hour

A unit of time equal to 60 minutes.

hour hand

The short hand on the clock that tells the hour.

hundred/hundreds

A grouping of 10 tens or 100 ones.

$$4 + 1$$

join

To add to an existing set.

length

The measure of one side of an object, typically the longer side.

less than/fewer

When the value in one expression is less than another expression.

$$7 - 2 = 5$$

7 is the
minuend

minuend

The number from which another number is subtracted.

$$7 - 2 = 5$$

— is the
minus sign

minus sign

The symbol that tells you to subtract.

minute

A unit of time equal to 60 seconds.

minute hand

The long hand on the clock that tells the minutes.

nickel

A U.S. coin that is worth 5 cents.

number line

A straight line with numbers placed at equal intervals.

octagon

odd

A number that cannot be split into two equal groups.

one/ones

A "one" is a single unit.

parallelogram

A quadrilateral with opposite sides that are parallel.

penny

A U.S. coin that is worth 1 cent.

pentagon

546
500

A curved arrow points from the digit 5 in the number 546 to the digit 5 in the number 500, illustrating the concept of place value.

place value

The value of a digit
depending on its place in a
number.

$$2 + 6 = 8$$

+ is the
plus sign

plus sign

The symbol that tells you to add.

quadrilateral

A polygon with four sides and four angles.

quarter

A U.S. coin that is worth 25 cents.

rectangle

A quadrilateral with four right angles.

regroup/trade/exchange

The process of exchanging 10 ones for 1 ten, 10 tens for 1 hundred, 10 hundreds for 1 thousand, etc.

rhombus

A parallelogram with equal sides and equal opposite angles.

row

Items arranged horizontally (left to right).

Total

Difference

Change

schema

A word problem's type.

separate

To subtract from an existing set.

side

The line segment that forms the outline of a shape.

sphere

square

1,546

standard form

A way to write numbers using digits.

subtract/subtraction

To compare two sets or to separate from a set.

$$7 - 2 = 5$$

2 is the
subtrahend

subtrahend

The number to be subtracted.

$$2 + 6 = 8$$

8 is the sum

sum

The result of adding.

ten/tens

A grouping of 10 ones.

third(s)

One of three equal parts
(of a whole).

Total	
P1	P2

total problem

A word problem with two or more amounts combined for a total.

trapezoid

A quadrilateral with one pair of parallel sides.

triangle

A polygon with three sides and three angles.

vertex/vertices

The point at which two line segments, lines, or rays meet to form an angle.

vertical

In a top-to-bottom orientation.

weight

The measure of how heavy something is.
